Hyderabad, India

PROFESSIONAL SUMMARY

Cybersecurity graduate with hands-on experience in vulnerability assessment and penetration testing (VAPT), network traffic analysis, log analysis, and incident investigation gained through an industry internship and independent lab-based projects. Skilled in network reconnaissance and enumeration with Nmap, packet analysis with Wireshark, web application security testing with Burp Suite and SQLMap, exploit validation with Metasploit, and Python-based security tool development. Certified Ethical Hacker (CEH) with Google, Microsoft, and IBM cybersecurity professional certificates. Seeking entry-level cybersecurity analyst, information security, or penetration testing roles.

TECHNICAL SKILLS

Programming & Scripting: Python, Bash
Operating Systems: Linux
Security Domains: Network Security, Web Application Security, Penetration Testing, Vulnerability Assessment, VAPT, Ethical Hacking, Incident Response, Security Monitoring, Log Analysis, Network Traffic Analysis, Privilege Escalation
Security Tools: Nmap, Wireshark, Burp Suite, Metasploit, SQLMap, Hydra, John the Ripper
Networking & Protocols: TCP/IP, DNS, HTTP/HTTPS, SSL/TLS, SSH, FTP, Firewalls, VPN
Version Control: Git, GitHub
Soft Skills: Problem-Solving, Analytical Thinking, Technical Documentation, Adaptability, Quick Learning

INTERNSHIP EXPERIENCE

Cybersecurity Intern — AUN Tech Consulting *Dec 2025 – Jan 2026*

- Conducted vulnerability assessments of web applications and internal systems by combining manual testing methodology with automated security scanning tools, supporting the organization's security assessment process.
- Built a Python-based SQL Injection (SQLi) vulnerability scanner targeting an OWASP Top 10 injection risk, automating detection of insecure input fields and database exposure points and reducing manual testing effort.
- Monitored network traffic and analyzed logs to identify suspicious activity, contributing to faster incident response and improved system reliability.

PROJECTS

HSBox Penetration Testing & Privilege Escalation Lab *Jul 2026 – Aug 2026*

- Performed network reconnaissance and service enumeration using Nmap, identifying HTTP/Drupal and anonymous FTP services in an authorized CTF/security lab environment.
- Used Metasploit to validate a vulnerable Drupal web service and obtain initial access, then performed Linux enumeration to investigate privilege-escalation paths.
- Enumerated SUID binaries, sudo permissions, user accounts, configuration files, and password hashes, documenting the attack path, security findings, impact, and remediation recommendations.

Network Traffic & Security Log Analysis Lab *Dec 2025 – Jan 2026*

- Analyzed network traffic using Wireshark (packet analysis) to understand TCP/IP communications, DNS queries, HTTP activity, connection patterns, and reconnaissance-related traffic.
- Performed log analysis of security-relevant events to identify unusual authentication attempts, suspicious connections, and potential indicators of compromise (IOCs).
- Correlated network observations with security events to build an incident investigation timeline and distinguish normal activity from potentially suspicious behavior.

Web Vulnerability Assessment Tool *Jul 2024*

- Developed a Python-based security assessment tool to automatically scan websites for common web application vulnerabilities, streamlining basic penetration testing tasks.
- Implemented modules to validate SSL/TLS certificate configuration and inspect critical HTTP security headers (e.g., X-Frame-Options, X-XSS-Protection) to strengthen website security evaluation.
- Improved security posture assessment efficiency by automating vulnerability discovery and configuration analysis, enabling faster detection of security gaps.

CERTIFICATIONS

Certified Ethical Hacker (CEH) — EC-Council *06 Oct 2026*
Google Cybersecurity Professional Certificate — Coursera *Dec 2025*
Microsoft Cybersecurity Analyst Professional Certificate — Coursera *Dec 2025*
IBM Cybersecurity Analyst Professional Certificate — Coursera *Nov 2025*

EDUCATION

Lovely Professional University — B.Tech, Computer Science & Engineering *Sep 2022 – Jun 2026*
CGPA: 7.78/10 | Phagwara, Punjab

Narayana Junior College — Intermediate (MPC) *Jun 2021 – May 2022*
Percentage: 92% | Hyderabad, Telangana

Narayana E-Techno School — Matriculation *Apr 2019 – Apr 2020*
CGPA: 10.0/10 | Hyderabad, Telangana
